ARE CONCERNED ABOUT.

GO GREEN NOPLASTICS

Major PROBLEM OF OUR COMMUNITY

Plastics are most versatile, diverse and durable high molecular weight organic materials. Plastics are mainly used as plastic bags, toy, packing material, building material, construction and electronics items.

Plastic is a soft, non-renewable resources Plastic materials have low heat resistant and poor ductility. But they are combustibility and release toxic fumes after burning. The recycling of plastic is not cost effective process the biodegradation of plastic takes 500 to 1,000 year but manufacturing takes only seconds.
